

Cabin Management System

Speed and simplicity at your fingertips.

Available on Bombardier Global 5000 and Global 6000 aircraft

BOMBARDIER

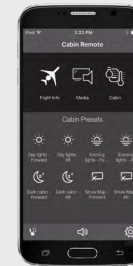

Global Aircraft New Cabin Management System

Bombardier's new cabin management system on Global 5000 and Global 6000 aircraft, powered by Rockwell Collins' Venue™, redefines the in-flight experience. Designed to be ultra-fast, reliable, intuitive and flexible, users have access to more features at their fingertips than ever before.

When paired with Ka-band which offers the fastest internet connectivity available worldwide*, users can seamlessly stream and mirror content straight to high-definition monitors just like at home.

controls

ULTRA-FAST

Enjoy lightning-fast response time when you interact with the new cabin management system. It provides immediate access to your work or entertainment content, flight maps or cabin settings. Go back and forth between reviewing a presentation for your next meeting and kicking back to watch movies in uncompressed 1080 HD format

INTUITIVE

Access key cabin controls in a single click and navigate the new app to intuitively control the cabin. Thanks to a simplified layout and an improved iconography, changing the cabin settings or media selections is remarkably easy.

RELIABLE

The system's robust design is based on a dependable architecture which ensures it is always up and running. The fiber optic ring network, which runs throughout the aircraft, has redundant paths to achieve rock-solid reliability.

FLEXIBLE

Compatible with both iOS and Android, you can pair up your favorite mobile device or console with ease. The large and ventilated media bay has all the options required to connect current and future electronic devices, such as the Apple TV™, Chromecast™, Blue-ray DVD players or Sony™ Playstation 4™.
